

Critical video, anytime, anywhere.

With C3, facilities can leverage video assets for a level of situational awareness never before experienced.

Uses of C3 at Convention Centers

- Manage a Fire Response
- Monitor a Suspicious Package
- Manage a Medical Incident
- Track a HazMat Spill
- Oversee a Helicopter Emergency Landing
- Emergency Response Planning
- First Responder Training
- Monitor Rooftop Ice
- Assess Weather Damage
- Direct Traffic Flow and People Assets
- Control Transportation and Parking

Features of C3 include:

- **LeX-Ray Vision:** View recorded video while continuing to watch live video through a split screen format, never missing a critical moment.
- **Time Sync Between Views:** Easily capture the same event from multiple cameras.
- **Easy to Use:** Mobile interface and web-based administration is flexible and intuitive.
- **Multiple Platforms:** Consistent interface across the web, iPhone, iPad, iPod touch and Blackberry devices to view up to 20 live feeds (device dependent) simultaneously.
- **Optimized Video Delivery:** Ensure immediate delivery of video no matter where you are.
- **Secure:** Multiple levels of encryption and security. Point to point video, your video stays on your secure network.
- **Seamless Integration:** Rapid deployment of solution and minimal impact on your existing infrastructure.
- **Mobile Investigations:** Quick identification of events, immediate playback, rewind, forward and slow motion your recorded video.
- **Share Critical Video:** Share critical video events in real time with the proper authorities.
