

Critical video, anytime, anywhere.

Helicopter video can be easily delivered to officers and agents in the field.

Uses of C3 in helicopter video

- Distribute video to teams on the ground
- View accident scenes and disaster areas
- Monitor live critical incidents for better management
- View suspects in car and on foot chases
- Share helicopter video with political officials and executives

Get more value from your helicopter asset by distributing the video to your entire team.

Features of C3 include:

- **LeX-Ray Vision:** View recorded video while continuing to watch live video through a split screen format, never missing a critical moment.
- **Easy to Use:** Mobile interface and web-based administration is flexible and intuitive.
- **Multiple Platforms:** Consistent interface across the web, iPhone, iPad, iPod touch and BlackBerry devices to view up to 20 live feeds (device dependent) simultaneously.
- **Optimized Video Delivery:** Ensure immediate delivery of video no matter where you are.
- **Secure:** Multiple levels of encryption and security. Point to point video, your video stays on your secure network.
- **Share Critical Video:** Share critical video events in real time with the proper authorities.
