

C³

Critical video, anytime, anywhere.

LEXTECH LABS

Easily conduct 24/7 remote inspections with C3.

Uses of C3 in Remote Inspections

- Inspect manufacturing lines
- Survey assets and resources
- Monitor instrumentation
- Assess supply levels
- Investigate threats to equipment
- Study remote facilities
- Monitor third party manufacturing facilities

Maximize the value of your manufacturing equipment or critical instrumentation with remote oversight.

Features of C3 include:

- **LeX-Ray Vision:** View recorded video while continuing to watch live video through a split screen format, never missing a critical moment.
- **Easy to Use:** Mobile interface and web-based administration is flexible and intuitive.
- **Multiple Platforms:** Consistent interface across the web, iPhone, iPad, iPod touch and BlackBerry devices to view up to 20 live feeds (device dependent) simultaneously.
- **Optimized Video Delivery:** Ensure immediate delivery of video no matter where you are.
- **Secure:** Multiple levels of encryption and security. Point to point video, your video stays on your secure network.
- **Seamless Integration:** Rapid deployment of solution and minimal impact on your existing infrastructure.
