

# Lextech Labs

Access to up-to-the-minute video data is important for all organizations—from education campuses to retail businesses—and today's busy industry leaders increasingly rely on video technology to enhance their situational awareness and responsiveness. With access to critical video anytime and anywhere, your organization can improve real-time decision making, extend back-room systems into the hands of new users and discover even more ways to improve security, operations and performance.

With C3 from Lextech Labs, you can access real-time and recorded video feeds from mobile devices for maximum command and control in urgent situations. Optimized delivery of video to mobile devices provides you the information you need when and where you need it. That means your team can respond to situations in the field as they happen.

Additionally, C3 provides you with the capability to process an unlimited number of video feeds, both recorded and live, helping to ensure you and your teams stay informed while on the move. And because you can leverage your existing video systems to collaborate with C3, there's no need to purchase additional costly equipment.

Lextech Lab's industry-leading technology allows the C3 software to interpret the bandwidth of a signal and adjust the number of frames per second transmitted to a mobile device. Innovative technology like this results in little to no latency in video footage, ever important to you and your teams in time-sensitive situations.

## Lextech Lab Solution Benefits

With C3 from Lextech Labs, you are better able to:

- + Access live and recorded video in the office and on the go.
- + Establish surveillance solutions and control remote surveillance.
- + Manage critical incidents and send information to first responders.
- + Share campus video and better manage critical situations.
- + Conduct mobile investigations.
- + Manage traffic flow and asset positioning.
- + Decrease response time for loss prevention.

## There When You Need It

Give your team the tools to make the most informed decisions possible—from security issues to everyday surveillance. In addition to a superior-quality video feed, C3 allows you to view live footage and recorded footage simultaneously on one device via a split screen. Video can be viewed by all essential personnel even when they're away from their command center. On-demand access to previously recorded footage is also available through C3. Mobile viewing can be set up quickly and easily from numerous devices, saving precious seconds in an emergency.

With the installation of multiple cameras in strategic locations along a textile manufacturing line, for example, a factory manager can monitor employee performance

## THE NETWORK MATTERS.

Lextech Labs solutions are available on America's largest and most reliable 3G network: Verizon Wireless.

and identify problem areas. And in using C3 from Lextech Labs, a business owner can be kept up to date on daily business operations and manage employees, assets and equipment remotely in real time.

### **Lextech Labs + Verizon Wireless**

As America's largest and most reliable voice and 3G data network, Verizon Wireless can enhance the way you do business. Together, Lextech Labs and Verizon Wireless provide remote access to critical video to keep field workers informed. Plus, flexible solutions allow you to easily customize the way you deploy Lextech Labs software.

### **Flexibility to Keep You in Control**

C3 helps you establish a comprehensive command center, equipped to communicate with and control an unlimited number of cameras on any number of devices. You can enhance your video-feed capabilities with C3 features like:

- + Split-screen format to view live and recorded video at the same time.
- + The ability to capture the same event from multiple cameras.
- + Flexible and intuitive mobile and Web-based interface.
- + The ability to view up to 20 live feeds consistently across the Web, and on iPhone,\* iPad,\* iPod touch\* and BlackBerry\* devices.
- + Immediate delivery of video no matter where you are.
- + Multiple levels of encryption and security.
- + Minimal impact on your current infrastructure with rapid solution deployment.
- + Immediate playback, rewind, fast-forward and slow motion of your recorded video.
- + Real-time sharing of video with proper authorities.
- + The ability to deploy unlimited cameras, video servers and users.
- + Pan, tilt and zoom abilities, depending on the camera.

C3 operates on numerous platforms, operating systems and devices. Currently, C3 operates on iPhone, iPad and BlackBerry devices. Mobile devices from Verizon Wireless provide comprehensive viewing power for tactical teams.

### **CHOOSE THE BEST NETWORK.**

The Business Solution Alliance is one part of the equation for helping your business. A widely available, stable wireless network is the other. That's why it makes sense to choose America's largest and most reliable 3G network: Verizon Wireless.

Of course, it also helps that you get:

- + Simple online account management.
- + 24/7 technical support.
- + Highly responsive customer support.
- + Discounts that increase as your business grows.
